三复合密封条:KMT-YT001

Three types of composite material sealing strips

材料:

奇美达三复合密封条在碰撞面做了外涂层处理,材料选用进口涂层材料,材质基材硬质部分为改性PP(硬度高),软质材质为三元乙丙橡胶TPV。

Material:

CHIMEDA three types of composite sealing strips have undergone external coating treatment on the collision surface, using imported coating materials. The base material part uses modified PP (high hardness), and the soft parts uses TPV material.

性能:

对于长期开关门的碰撞,表面涂层有非常优秀的耐磨防划伤效果。涂层处理以后,表面触感爽滑,在高温情况下,不会有其他材质的黏连。

此工艺借鉴于汽车密封条工艺特点,有着优良的耐磨性、耐候性、持久的回弹性。

Performance:

For long-term door opening and closing collision tests, the surface coating shows excellent wear resistance and anti-scratch effects. After coating, the surface feels matte and will not stick to other materials at high temperatures.

This process draws on the characteristics of the automobile sealing strip process, and has excellent wear resistance, weather resistance, and long-lasting resilience.

磁吸静音密封条:KMT-CX006 Magnetic Silent Sealing Strip

材料:

奇美达磁吸静音密封条,用于室内木门门框密封,采用高回弹聚氨酯泡沫内芯,高韧性聚乙烯外膜,PP骨架及TPV塑料倒钩完美结合,选用强力磁吸条,当门扇接近门框时,由于门扇与门框间磁吸条的吸力,使门自动关闭。

Material:

CHIMEDA magnetic silent sealing strip, used for wooden door frames sealing, uses high-resilience polyurethane foam inner core, high-toughness polyethylene outer film, PP skeleton and TPV plastic barbs perfectly combined and uses strong magnetic strips. When the door leaf approaches the door frame, the door automatically closes due to the suction of the magnetic strip between the door leaf and the door frame.
